ALTRIXS · STAFF PORTAL · PHASE 1

Developer kaam + test guide

Hinglish, simple language. Ek-ek karke kya banana hai aur kaise check karna hai. Mobile app is phase me nahi. Video = Zoom. Database = Postgres.

Audience: junior / clinic developer | 30 Aug 2026 | v1.0

Pehle dimag me yeh baithao

- **Patient mobile app mat banana.** Woh Phase 2 hai. Client abhi *browser* use karega — intake link aur Zoom join link.
- PDF / client doc me **Chime + Firestore** likha ho to ignore. Humara stack: **Zoom + Postgres**.
- SMS / email me **kabhi diagnosis, session note, "depression", medicine naam** mat likhna. Sirf date, time, doctor ka naam, ya "You have a new message."
- Naya feature se pehle **purana clinic loop** chalao. Woh toot gaya to naya kaam merge mat karo.

Suggested order (upar se neeche)

0 → 1 → 2 → 3 → 5 → 6 → 8–9 → 10 → 7 → 11 → 12–14. Ticket **4 (payment at book)** tabhi jab lead bole day-one chahiye.

0 Pehle existing loop chalao (naya code nahi)

KYA KARNA HAI

Latest `main` lo. Database seed chalao. File **docs/Altrixs-E2E-Clinic-Loop-QA.md** ke 8 steps khud complete karo. Password seed users ka: **Altrixs@123**.

Role-demo clinic: office@role-demo.local (front desk), therapist@role-demo.local, billing@role-demo.local. Multi-role alag clinic: multirole@altrixs.local.

TEST

- Waitlist → match clinician → Convert to Intake → public `/intake/...` complete → client roster me naam.
- Appointment virtual + in-person. Check-in. Note Draft → Sign → Lock.
- Mood 2/10 check-in → Alerts me dikhe → review.
- Locked note se Draft claim. NP/Psych Rx page therapist ko block.

Koi step fail = pehle woh fix. Naya ticket start mat karo.

1 Live clinic ke liye keys (.env)

SIMPLE MATLAB

App ko batana hai: database kahan hai, login secret kya hai, email kaise bhejna, Zoom ka account, insurance check (Availity), clinic ka monthly Stripe plan.

KYA KARNA HAI

- `DATABASE_URL`, `AUTH_SECRET`, `AUTH_URL` = jo URL browser me khulegi (local pe http://localhost:3000, live pe https://altrixs.com).
- SMTP — staff invite aur password OTP.
- Zoom: account id, client id/secret, host email. Example file: `.env.example`.
- Passwords / secrets git pe commit mat karo.

TEST

- Login chale. Invite email inbox me aaye.
- Keys missing hon to page crash na kare — samajh aaye wala error.
- Galat AUTH_URL pe login loop / cookie tootna nahi chahiye (local vs live mix mat karo).

2 Zoom telehealth (staff + client browser)

SIMPLE MATLAB

Doctor video call Zoom se kare. Client phone pe app nahi — **link** browser me khole. Call khatam = appointment complete.

MAT KARNA

AWS Chime, mobile app join button, recording S3, Transcribe Medical.

TEST

1. Front desk **Virtual** appointment banaye.
2. Therapist Start/Join → Zoom meeting khule (host).
3. Incognito window me join link — bina staff login ke client join ho.
4. End session → appointment status **Completed**.
5. Doosri clinic ka join token kaam na kare.

3 Appointment confirm — email / SMS (bina app)

SIMPLE MATLAB

Appointment save hote hi client ko yaad: kab aana hai, kaunsa clinician. Clinical baat message me nahi.

KYA KARNA HAI

- Pehle email theek se bhejo. SMS tab jab clinic Twilio/Pinpoint de.
- Virtual visit pe Zoom join link alag se (email/SMS), diagnosis nahi.
- Phone/email empty ho to save se pehle error dikhao — silent fail nahi.

TEST

- Naya appointment → inbox me text padho: sirf date/time/name.
- Fake diagnosis SMS me leak to nahi (code review + ek real send).

4 Book pe Pay Now vs Pay at clinic (optional)

SIMPLE MATLAB

Front desk book karte time poochhe: abhi card se ya clinic aake pay. Yeh **visit ka paisa** hai. Altrixs ka monthly clinic subscription Stripe alag cheez hai — mat milaana.

TEST (JAB LEAD BOLE BANANA HAI)

- Pay at clinic → appointment Due at clinic.
- Pay Now Stripe test card → Paid.
- Billing role ko list dikhe.

Lead bole “abhi nahi” to yeh ticket skip.

5 Client papers / photos upload

SIMPLE MATLAB

Purani reports, ID photo chart pe file. Sirf staff avatar nahi. Front desk aur clinician dono upload kar saken.

TEST

- FD upload → therapist same client pe file dekhe.
- Clinic B ka user Clinic A ki file na dekhe.
- Galat file type / bahut badi file → error message.

6 Consents — tablet / web link (app nahi)

SIMPLE MATLAB

Client finger se clinic me sign kare, ya ghar pe email/SMS ka **website link** (intake jaisa). App Store nahi.

TEST

- Public intake consents complete → staff Consents page pe Signed.
- Same link dobara submit na ho (already signed).

7 Insurance eligibility (Availity)

SIMPLE MATLAB

“Is client ka insurance is visit ke liye chalega?” Button dabao, jawab database me save. Keys na hon to crash nahi — clear message.

TEST

- Billing / front desk check → row persist (refresh ke baad bhi).
- Therapist ko yeh page role se band (jo roleAccess me hai).
- Galat member ID → readable error, blank white screen nahi.

8 Claims — pehle draft sahi

SIMPLE MATLAB

Paisa insurance se maangne se pehle note signed + locked hona chahiye. Clearinghouse (asli submit) alag bada kaam — vendor ke bina “Submitted” mat dikhana.

TEST

- Lock se pehle Generate claim fail / empty list.
- Lock ke baad Draft claim, note se juda.
- Telehealth visit pe modifier GT (agar product rule yahi hai).

9 Progress notes polish

SIMPLE MATLAB

Doctor type kare to draft save hota rahe. Sign ke baad original note badalna illegal — addendum alag. Purani session late likhi to “Late entry” dikhe.

TEST

- Draft, thoda wait / refresh — text gaya nahi.
- Signed note ka content PATCH → 403, DB me purana text.
- Session 2 din purani + aaj sign → Late Entry header.

10 Risk alerts (bina patient app)

SIMPLE MATLAB

Client mood bahut kharab ya PHQ-9 last question (khud ko nuksan) 1+ → hamesha High alert. 1 ghante koi na dekhe to director ko email/SMS: "A client alert needs attention" — naam/diagnosis nahi.

TEST

- Check-in mood 2/10 → Alerts Unreviewed.
- PHQ item 9 = 1, baaki 0 → phir bhi High (API me, sirf UI me nahi).
- Review empty note se close ho sakta (product), audit me "no documentation" optional.

11 Safety plan + discharge (staff)

SIMPLE MATLAB

Crisis ke liye 6-step plan + ghar ko safe banana (means). Purana plan delete mat karo. Discharge ke 7 din aur 30 din baad phone task clinician ke To-Do pe.

TEST

- Plan save, list me; delete API fail.
- Discharge sign → 7-day follow-up task due date theek.
- Peer support clinical progress notes me na ghusey (alag module).

12 E-prescribe — abhi stub, jhoot mat bolo

SIMPLE MATLAB

Asli dawai pharmacy ko DrFirst se jaati hai. Woh contract ke bina custom form mat banao jo "sent to CVS" dikhe. Page pe likho: pharmacy network pending. Sirf Psych/NP.

TEST

- Therapist prescriptions URL → bounce /dashboard.
- NP save → list me row (clinic JSON theek), "e-Rx transmitted" mat likho.

13 License expiry

SIMPLE MATLAB

Doctor ka license khatam → nayi billable appointment / claim mat jane do (lead confirm). Banner director ko.

TEST

- Expiry yesterday → book/claim fail ya strong warning (jo rule lock ho).
- Valid license → normal book.

14 Roles + doosri clinic ka data leak na ho

SIMPLE MATLAB

Har staff sirf apni clinic ke clients dekhe. URL type karke doosri clinic ka ID mat khulna.

TEST

- Clinic A client id Clinic B session se 404/403.
- Billing Notes na khole. Peer Diagnoses 403.
- multirole@altrixs.local switch: home + sidebar badle, purana page stuck na rahe.
- `npm run typecheck` pass. Role tests: `tests/role-access.test.ts`.

Har PR se pehle yeh 5 minute

1. `npm run typecheck`
2. Do alag role se login
3. Ek dummy client → appointment → note lock
4. Zoom (keys hon to) join + end
5. Galat role ki URL type karke bounce check

Abhi mat banana (Phase 2 / baad)

Cheez	Kyun nahi abhi
Patient mobile app (login/home)	Phase 2. Client ko mockup PNG de chuke hain.
App se PHQ, push, in-app chat	App ke baad
Chime, Transcribe, Bedrock AI note	Stack Zoom + Postgres
DrFirst PDMP / EPCS	Jab clinic contract de
Clearinghouse 277 + ERA 835	Vendor + enrollment
CARF score, QI 12 live numbers, grievance 10-day clock	Jab lead bole accreditation day-one

Sawal ho to lead se poochh (khud mat decide)

- Ticket 4 payment day-one hai ya nahi?
- License expire pe hard block ya sirf warning?
- Client no-show Zoom pe kya status?
- SMS vendor kaun (Twilio / Pinpoint / sirf email)?
