ALTRIXS EHR · CLINICAL & BILLING MODULES

# Aaj ke 9 Features - Developer Kaam + Test Guide

Hinglish simple language. Aaj jo 9 EHR modules ache se built & DB persist hue hain, unka ek-ek button kyun hai aur manually UI me kaise test karna hai.

Audience: Altrixs EHR Team | 15 Sep 2026 | 9 Modules

## Pehle dimag me yeh baithao

- Saare 9 features me REAL database persistence (PostgreSQL SSH tunnel 127.0.0.1:5433) active hai.
- UI me koi bhi button decorative nahi hai — har button backend API ya modal action triggers karta hai.
- Manual UI testing ke dauran F5 refresh karke persistence confirm karna zaroori hai.

## Aaj ke 9 Features Testing Sequence (1 '" 9)

1. Assessments '" 2. Evaluations '" 3. MSE Widget '" 4. Risk Widget '" 5. ICD-10 Search '" 6. LOCUS '" 7. Mandatory Report '" 8. MBC Dashboard '" 9. EDI Billing

### 1 Clinical Assessments (PHQ-9, GAD-7 & Trend Graphs)

URL: /dashboard/ehr/assessments

**SIMPLE MATLAB**
Patient ke depression & anxiety severity score ko 40+ digital questionnaires se auto-calculate karna aur history trends graph me save karna.

**YEH BUTTON / FEATURE KYUN HAI?**
*"+ Administer Digital" button questionnaire form modal kholta hai. "Submit Assessment" button score calculate karke DB persistence save karta hai. "History & Trends" tab chart graph render karta hai.*

**KYA KARNA HAI**
Digital questionnaire answers accept kare, total score compute kare, severe suicidal risk indicator dikhaye, aur PostgreSQL DB me record persist kare.

**MAT KARNA**
Static mock scores display mat karo. Refresh ke baad DB se real records fetch hone chahiye.

**TEST (MANUALLY KAISE CHECK KAREIN)**
1. URL /dashboard/ehr/assessments par patient (e.g. Maria Santos) select karo.
2. PHQ-9 card par "+ Administer Digital" button dabao.
3. Saare 9 questions ke answers tick karo (Q9 Suicide ideation High select karo).
4. "Submit Assessment" click karo !’ Severely Depressed (Score 19) aur Red Safety Flag alert dikhega.
5. "History & Trends" tab click karo !’ Graph aur history table me score persisted milega (F5 refresh ke baad bhi).

## 2 Clinical Evaluations & Locked Addendums (v1 -> v2)

**URL: /dashboard/ehr/evaluations**

**SIMPLE MATLAB**
Comprehensive diagnostic intake reports banana jo initial evaluation ke baad legal reasons ki wajah se locked ho jaate hain.

**YEH BUTTON / FEATURE KYUN HAI?**
*"+ New Evaluation" button 8 standard clinical templates load karta hai. "Sign & Finalize" button evaluation ko v1 par lock kar deta hai. "Amend Record" button v2 addendum audit trail add karta hai.*

**KYA KARNA HAI**
Template loader, clinician digital signature, signature lock, aur audit trail addendum versioning (v1 '" v2).

**MAT KARNA**
Finalized note ko direct edit / overwrite mat karne do (illegal in healthcare).

**TEST (MANUALLY KAISE CHECK KAREIN)**
1. URL /dashboard/ehr/evaluations par "+ New Evaluation" button dabao.
2. Template choice aur clinical details fill karke "Sign & Finalize Evaluation" click karo.
3. Evaluation card lock hokar "Finalized (v1)" status badge dikhayega.
4. "Amend Record" button click karke note amend karo !' Status "v2 (Amended)" audit log timestamp ke saath update hoga.

## 3 Mental Status Examination (MSE) Reusable Widget

**URL: Embedded in Evaluations & Progress Notes**

**SIMPLE MATLAB**
Patient ki appearance, mood, affect, thought process, aur memory observations ko rapid select grid se note me capture karna.

**YEH BUTTON / FEATURE KYUN HAI?**
*MSE quick-selection chips/buttons doctor ka manual typing time bachate hain aur standardized clinical vocabulary enforce karte hain.*

**KYA KARNA HAI**
Appearance, Mood, Speech, Cognition dropdowns/chips select hone par formatted text JSON & narrative me build ho.

**TEST (MANUALLY KAISE CHECK KAREIN)**
1. Evaluation form me Mental Status Examination section par jao.
2. Appearance (Well-groomed), Mood (Anxious), Speech (Rapid) select karo.
3. Verify karo ki selected options clinical summary box me real-time formatted text generate kar rahe hain.

## 4 Risk Assessment Widget (Suicide, Harm & Substance Risk)

**URL: Embedded in Evaluations & Safety Plans**

**SIMPLE MATLAB**
Patient ka Suicide Risk, Harm to Others, aur Substance Abuse Risk level (Low / Moderate / High) evaluate karna.

**YEH BUTTON / FEATURE KYUN HAI?**
*Risk pill buttons (Low/Moderate/High) visual priority flags raise karte hain aur automated alerts activate karte hain.*

**KYA KARNA HAI**
Risk rating selection, mitigating factors input, aur high-risk status triggering.

**TEST (MANUALLY KAISE CHECK KAREIN)**
1. Risk assessment widget me Suicide Risk = "High" select karo.
2. Mitigating factors text field fill karo ("Family support present").
3. Form save karne par Risk badge Red highlight ke saath patient chart par persist ho.

## 5 ICD-10 Diagnosis Autocomplete Search Component

**URL: Embedded in Evaluations & Claims**

**SIMPLE MATLAB**
Medical diagnosis search box jisme code (e.g. F32.9) ya bimari ka naam (e.g. Major Depressive Disorder) type karte hi real-time suggestions milte hain.

**YEH BUTTON / FEATURE KYUN HAI?**
*Autocomplete search dropdown invalid diagnosis codes ko block karta hai aur billing claims reject hone se bachata hai.*

**KYA KARNA HAI**
Debounced search API call, ICD-10 code + description display, aur selected item pill insertion.

**TEST (MANUALLY KAISE CHECK KAREIN)**
1. Diagnosis field me "Depression" ya "F32" type karo.
2. Autocomplete dropdown me "F32.9 - Major depressive disorder, unspecified" select karo.
3. Selected diagnosis code form record se attach hokar save ho.

## 6 LOCUS / CALOCUS Assessment Engine & Clinician Override

**URL: /dashboard/ehr/locus**

**SIMPLE MATLAB**
7-dimension scoring se adult aur youth patients ke liye clinical Level of Care (e.g. Outpatient vs Residential) determine karna.

**YEH BUTTON / FEATURE KYUN HAI?**
*7 rating dimension buttons composite score calculate karte hain. "Clinician Override" button doctor ko system recommendation change karne aur written rationale save karne ka option deta hai.*

**KYA KARNA HAI**
7 dimensions (Risk of Harm, Functional Status, Co-morbidity, etc.) ratings calculation, recommended level mapping, aur override rationale persistence.

**TEST (MANUALLY KAISE CHECK KAREIN)**
1. URL /dashboard/ehr/locus par jaakar 7 dimensions ke ratings buttons click karo.
2. Live Recommended Level (e.g. Level 3 High-Intensity Outpatient) update hoga.
3. "Clinician Override" button click karke custom rationale text dalo aur "Save LOCUS Assessment" dabao.
4. Assessment history drawer me entry saved override reason ke saath persist honi chahiye.

## 7 Mandatory Reporting & Duty to Warn System (COMAR Compliance)

**URL: /dashboard/compliance/mandatory-reporting**

**SIMPLE MATLAB**
Tarasoff duty to warn threats ya child/vulnerable adult abuse instances ko statutory deadlines (12h-72h) ke andar legally document aur report karna.

**YEH BUTTON / FEATURE KYUN HAI?**
*"+ Document Report" button COMAR compliance modal kholta hai. "Print Report" button official authority copy print karta hai. Chevron "v" button card expand karke case #, agency, aur legal consult details dikhata hai.*

**KYA KARNA HAI**
Emergency 988 banner, 90-day metrics, 6 legal categories, case # tracking, purple card layout, print view, aur status update modal.

**TEST (MANUALLY KAISE CHECK KAREIN)**
1. URL /dashboard/compliance/mandatory-reporting par jao.
2. "+ Document Report" button click karke "Duty to Warn / Protect (Tarasoff)" choose karo.
3. Narrative, Agency (Baltimore City Police), Case # (BPD-2026-449821) dalo aur save karo.
4. Card me Chevron "v" click karke soft purple inner box expand check karo, phir "Print Report" dabao.

## 8 Measurement-Based Care (MBC) Dashboard & Risk Panel

**URL: /dashboard/mbc**

**SIMPLE MATLAB**
Severe risk flagged patients ko central panel par highlight karke clinic supervisor se acknowledgment note save karwana.

**YEH BUTTON / FEATURE KYUN HAI?**
*"Acknowledge Alert" button isliye hai taaki high-risk patient alerts par taken action aur clinical review notes legally record ho sakein.*

**KYA KARNA HAI**
Attention Required risk drawer, high-risk patient listing, acknowledgment response modal, aur PostgreSQL DB status update.

**TEST (MANUALLY KAISE CHECK KAREIN)**
1. URL /dashboard/mbc par jao.
2. Flow 1 me Severe PHQ-9 flag wala patient Attention Required panel me dekho.
3. "Acknowledge Alert" button click karke note text dalo ("Reviewed score, safety plan updated") aur save click karo.
4. Alert status update hokar DB me Acknowledged save ho jayega.

## 9 EDI Billing & Clearinghouse (Prior Auth EDI 278 & Claims EDI 837)

**URL: /dashboard/billing/prior-auth & /claims**

**SIMPLE MATLAB**

Insurance pre-approval (EDI 278) aur 50-claim batch billing (EDI 837) electronically clearinghouse network ko submit karna.

**YEH BUTTON / FEATURE KYUN HAI?**

*"Submit Prior Auth" button EDI 278 JSON payload process karta hai. "Submit 50-Claim Batch" button electronic claims batch engine test karta hai.*

**KYA KARNA HAI**

Prior authorization submission, claims payload generation, clearinghouse status response, aur batch execution logging.

**TEST (MANUALLY KAISE CHECK KAREIN)**

1. URL /dashboard/billing/prior-auth par service code 90837 choose karke "Submit Prior Auth" dabao !’ Raw EDI payload response dikhega.

2. URL /dashboard/billing/claims par "Submit 50-Claim Batch" click karke 50 claims clearinghouse batch execution log verify karo.
