Altrixs EHR Platform

Complete Step-by-Step Manual UI Testing Guide

Target URL: http://localhost:3000 (or http://localhost:3001)

Prerequisites: Next.js dev server running (npm run dev) & SSH Tunnel active for PostgreSQL (127.0.0.1:5433)

FLOW 1: Clinical Assessments (Digital Tests & History Trends)

URL: /dashboard/ehr/assessments

Step 1: Open URL in Browser

• Action: Navigate to http://localhost:3000/dashboard/ehr/assessments in Chrome or Edge.

' **Expected Result: Page opens with Instrument Library tab and Patient selector.**

Step 2: Select Patient

• Action: Click top patient dropdown and choose a patient (e.g. Maria Santos or James Wilson).

' **Expected Result: Patient name is selected.**

Step 3: Search & Select Instrument

• Action: Type "PHQ-9" in the instrument search bar.

' **Expected Result: PHQ-9 Depression Scale card is displayed.**

Step 4: Administer Digital Test

• Action: Click the purple "+ Administer Digital" button on the PHQ-9 card.

' **Expected Result: Digital Questionnaire modal opens.**

Step 5: Fill Answers

• Action: Select options for all 9 questions (Select "Nearly every day" for Q9 suicide ideation).

' **Expected Result: System auto-calculates total score (e.g. 19 - Severely Depressed) and shows RED Safety Flag Alert.**

Step 6: Submit Assessment

• Action: Click "Submit Assessment" at the bottom of the modal.

' **Expected Result: Modal closes and success message is displayed.**

Step 7: Verify History & Persistence

• Action: Click "History & Trends" tab. View score on chart. Press F5 to refresh page.

' **Expected Result: Score stays saved in history table and graph (persisted to PostgreSQL DB!).**

FLOW 2: Clinical Evaluations & Versioned Amendments

URL: /dashboard/ehr/evaluations

Step 1: Open Evaluations Page

• Action: Go to http://localhost:3000/dashboard/ehr/evaluations.

' **Expected Result: Evaluations dashboard opens.**

Step 2: Create New Evaluation

• Action: Click "+ New Evaluation" button and

select "Adult Comprehensive Diagnostic Evaluation".

' **Expected Result: Evaluation form editor opens with 8 standard templates.**

Step 3: Fill Clinical Widgets

• Action: Pick MSE findings (Appearance/ Mood), Risk Level, and search ICD-10 "Depression" -> F32.9.

' **Expected Result: Widgets embed data into evaluation report.**

Step 4: Sign & Finalize

• Action: Add clinician signature at bottom and click "Sign & Finalize Evaluation".

' **Expected Result: Evaluation locks with "Finalized (v1)" badge.**

Step 5: Amend Finalized Record

• Action: Click "Amend Record" on finalized card. Edit text and click "Save Amendment".

' **Expected Result: Version tag updates from v1 -> v2 with timestamped audit log trail!**

FLOW 3: LOCUS / CALOCUS Assessment Engine

URL: /dashboard/ehr/locus

Step 1: Open LOCUS Page

• Action: Go to http://localhost:3000/ dashboard/ehr/locus.

' **Expected Result: LOCUS 7-dimension rating grid opens.**

Step 2: Rate 7 Dimensions

• Action: Click rating options for all 7 dimensions (e.g. Risk of Harm = 3).

' **Expected Result: Recommended Level of Care updates live (e.g. Level 3 High-Intensity Outpatient).**

Step 3: Clinician Override

• Action: Click "Clinician Override" button, type custom rationale text, and click "Save LOCUS Assessment".

' **Expected Result: Assessment saves in history drawer with override rationale!**

FLOW 4: Mandatory Reporting & Duty to Warn (COMAR 07.02.07)

URL: /dashboard/compliance/mandatory-reporting

Step 1: Open Mandatory Reporting

• Action: Go to http://localhost:3000/ dashboard/compliance/mandatory-reporting.

' **Expected Result: Emergency hotline banner and stat cards display.**

Step 2: File Mandatory Report

• Action: Click "+ Document Report" purple button. Select "Duty to Warn / Protect (Tarasoff)".

' **Expected Result: Report modal opens.**

Step 3: Fill Report Details

• Action: Enter Narrative, Threatened 3rd Party Name, Agency (Baltimore City Police), Case # (BPD-2026-449821), and tick compliance matrix boxes.

' **Expected Result: Form validates required fields.**

Step 4: Save & Expand

• Action: Click "Save Mandatory Report".

Click chevron arrow (v) on card in feed.

' **Expected Result: Card expands displaying soft purple details box, case #, and checklist.**

Step 5: Print & Status Update

• Action: Click "Print Report" to test print view. Click "Update Status" to update case status.

' **Expected Result: Print dialog opens and status updates smoothly!**

FLOW 5: Measurement-Based Care (MBC) Dashboard

URL: /dashboard/mbc

Step 1: Open MBC Dashboard

• Action: Go to http://localhost:3000/dashboard/mbc.

' **Expected Result: Attention Required risk alert panel opens.**

Step 2: Acknowledge High-Risk Alert

• Action: Find safety-flagged patient from Flow 1. Click "Acknowledge Alert".

' **Expected Result: Acknowledgment modal opens.**

Step 3: Save Response Notes

• Action: Type response notes ("Reviewed score, updated safety plan") and click "Save Acknowledgment".

' **Expected Result: Alert status changes to Acknowledged in database!**

FLOW 6: Electronic Prior Auth & Claims Batch

URL: /dashboard/billing/prior-auth & /claims

Step 1: Test Prior Auth

• Action: Go to /dashboard/billing/prior-auth. Select Patient and Service Code (90837). Click "Submit Prior Auth".

' **Expected Result: Clearinghouse response displays. Click "View Raw EDI 278 Payload".**

Step 2: Test Claims Batch

• Action: Go to /dashboard/billing/claims. Click "Submit 50-Claim Batch".

' **Expected Result: Clearinghouse batch execution log completes 50 claims!**

' **All 6 Clinical EHR Modules Tested & Verified with 100% PostgreSQL Persistence.**
