Altrixs Clinic Platform

Pichle Week Ka Delivery Report

18 September 2026 (Friday sham) !’ 28 September 2026

Client handoff — features, end-to-end flows, aur use guide (Hinglish)

Yeh document batata hai ki pichle week Altrixs production repo mein kya-kya live-ready kaam hua, har feature ka asli flow kya hai, aur clinic staff usko screen pe kaise chalaye. Demo-only / fake success ko live truth nahi maana gaya — jahan AWS/Availity keys nahi hain wahan system honestly demoMode ya fail-closed dikhata hai.

1. Week ka summary (ek nazar mein)

- Clinical modules: TMS + Spravato (GAD-7, SpO ,), assessments (RMS, C-SSRS), evaluations (CAGE-AID + ASAM widgets).
- Privacy & compliance: PII mask (therapist vs PD/Admin), Protected Records + Break-the-Glass (24h grant).
- PRP: qualifying Dx, referral, enroll steps — Availity eligibility fail-closed (fake “eligible” nahi).
- Ops: public Schedule + admin Scheduling Settings, Labs orders/results, A/R Control, Claim Scrubber, eStatements.
- Comms & AI assists: Telehealth Phone (Call firstName, number hide), Communications (SMS/call thread), Notes smart phrases (.cbt) + copy-forward + Comprehend, Scribe, HealthLake, Textract insurance scan, Personalize home insights, Ctrl+K command palette.
- Data: naya Prisma schema Postgres pe apply; forms APIs se DB mein save; local runtime manuals M1–M14 PASS prove kiye.

2. Important rules (client ke liye clear)

- Static DEMO_* arrays in slices ka live source of truth nahi hain.
- PRP_ELIGIBILITY_TEST_PASS production pe true mat lagana — test shortcut hai.
- AWS (Connect / HealthLake / Comprehend / Textract / Personalize) keys na hon to demoMode / fail-closed — yeh bug nahi, honest mode hai.
- Live deploy se pehle production DB pe prisma schema sync zaroori hai.

3. Feature-by-feature — kya, flow, kaise use kare

3.1 TMS & Spravato clinical module

Kya banaya / kya change hua

- TMS courses / sessions + PHQ-9 (aur GAD-7 field) persist.
- Spravato enrollment + sessions; SpO , / side-effects fields.
- Role gate: therapist ko TMS write pe 403 jahan allowed nahi.

Flow (kaise chalta hai)

Step 1: Open module

Dashboard !’ EHR !’ TMS / Spravato page kholo.

Step 2: Select patient course/enrollment

Existing course ya naya enrollment choose / create karo — data API se Postgres mein jata hai.

Step 3: Session + scores

Session save, PHQ-9 / GAD-7, Spravato vitals (jaise SpO ,) enter karo !’ Save. Refresh ke baad wahi rows dikhni chahiye.

Clinic team kaise use kare

- Psych / NP / authorized clinical roles se chalayein.
- Refresh karke confirm karein ke scores gayab nahi hue (DB persist).

3.2 PWA offline notes (encrypted draft !’ sync)

Kya banaya / kya change hua

- Offline banner + encrypted IndexedDB drafts.
- Online hone pe Sync Now !’ ProgressNote DB mein; queue clear.

Flow (kaise chalta hai)

Step 1: Offline

Network band / offline mode mein note draft save hota hai (encrypted local).

Step 2: Back online

Banner se Sync Now !’ server API note create/update !’ Postgres ProgressNote.

Clinic team kaise use kare

- Field clinicians ke liye: pehle short note offline, clinic wi fi pe Sync Now dabayein.

3.3 EHR Migration import (10 platforms)

Kya banaya / kya change hua

- Admin Migration: Valant etc. CSV import.
- dryRun = zero Client/User/MigrationJob writes; live import pe MigrationJob + rows.

Flow (kaise chalta hai)

Step 1: Dry run

Admin !’ Migration !’ platform choose !’ Dry run. Preview counts; DB mein job/client create nahi.

Step 2: Live import

Confirm ke baad import !’ MigrationJob history + imported clients.

Clinic team kaise use kare

- Pehle hamesha dry run. Live sirf jab mapping sahi lage.

3.4 PII mask (phone / email / address)

Kya banaya / kya change hua

- Therapist (aur non-PD roles) pe masked bullets (••••).
- Practice Director + Admin ko clear values.

Flow (kaise chalta hai)

Step 1: Therapist login

Client open !’ phone/email masked JSON/UI.

Step 2: PD/Admin login

Same client !’ clear contact fields.

Clinic team kaise use kare

- Front-line staff ko full PHI tabhi jab role allow kare; emergency pe Break-the-Glass.

3.5 PRP — Dx codes, referral, enroll (+ Availity)

Kya banaya / kya change hua

- Qualifying ICD-10 Dx tab.
- Referral create (e.g. PRP-#### style ids).
- Multi-step enroll; PriorAuth happy path jab eligibility clear ho.
- Default: Availity down/unconfigured !’ 502 fail-closed (fake eligible nahi).

Flow (kaise chalta hai)

Step 1: Referral

PRP !’ Referral !’ client + dx !’ submit !’ referral row DB.

Step 2: Enroll
Enroll wizard steps; eligibility call Availity.

Step 3: If blocked
502 / not eligible = payer config ya live Availity keys chahiye — product ne jhoothi green light nahi di.

Clinic team kaise use kare

- Demo clinic mein enroll step 2 block ho sakta hai bina Availity config ke — expected.
- Production pe real Availity credentials + payer mapping set karein.

3.6 Protected Records + Break-the-Glass (BTG)

Kya banaya / kya change hua

- SensitiveRecord protection.
- Unauthorized GET !' 403 SENSITIVE_RECORD.
- BTG grant 24h !' phir chart access; audit log.
- Client detail page pe bhi Break-the-Glass form (roster + detail).

Flow (kaise chalta hai)

Step 1: Protect
PD/Admin Protected Records se client protect.

Step 2: Blocked access
Clinician chart khole !' 403 / BTG UI.

Step 3: Grant
Reason ("e15 chars) !' Confirm !' 24h grant !' reload !' PHI dikhe; log mein entry.

Clinic team kaise use kare

- BTG sirf emergency. Reason clinical/audit-ready likhein.

3.7 Assign Clinician + 187 payers + Waystar / HIE (earlier slices, ab repo mein)

Kya banaya / kya change hua

- Unassigned clients pe purple Assign Clinician CTA; assigned pe Warm Handoff.
- 187 payers / 9 categories intake + matching.
- Waystar dual-clearinghouse (claims) + Availity eligibility split.
- SMART on FHIR + CRISP HIE page.

Flow (kaise chalta hai)

Step 1: Assign
Clients list !' Assign Clinician !' clinician choose !' treatment team save.

Step 2: Payer
Intake / insurance dropdown se payer group select.

Step 3: HIE
EHR !' HIE !' query portal (configured env ke saath).

Clinic team kaise use kare

- Billing team claims Waystar path; eligibility Availity — dono mix mat samjhein.

3.8 Public Schedule + Admin Scheduling Settings

Kya banaya / kya change hua

- Admin settings save !' public /schedule unauthenticated booking.
- Confirmation code AC-###### Appointment row mein.
- embed=true chrome hide; iframe headers.
- Fix: public scheduling APIs pehle auth se 401 the — ab public allowlist.

Flow (kaise chalta hai)

Step 1: Admin save
Dashboard !’ Admin !’ Scheduling Settings !’ hours/services/rules !’ Save (DB).

Step 2: Public book
Website /schedule (ya embed) !’ service !’ slot !’ patient details + HIPAA !’ Book.

Step 3: Confirm
Patient ko AC-###### milta hai; staff Appointments mein row dekhe.

Clinic team kaise use kare

- Website embed ke liye org slug / booking URL settings se copy karein.
- Test book karke confirmation code DB/UI dono mein verify karein.

3.9 Labs (orders + results)

Kya banaya / kya change hua

- Labs page real clients se.
- ICD multi + panels + Other/custom panel.
- orderedBy = current user; refresh ke baad order rehti hai.

Flow (kaise chalta hai)

Step 1: New order
EHR !’ Labs !’ client !’ ICD + panel (ya Other text) !’ Submit.

Step 2: Persist
POST /api/labs/orders !’ LabOrder row; list refresh.

Clinic team kaise use kare

- Custom panel “Other” mein type karke bhi order banaya ja sakta hai.

3.10 Billing — A/R Control, Claim Scrubber, eStatements

Kya banaya / kya change hua

- A/R KPIs claims DB se (hardcoded demo KPIs nahi).
- Claim scrub: errors pe submit block.
- eStatements generate !’ PatientStatement rows.

Flow (kaise chalta hai)

Step 1: A/R
Billing !’ A/R Control !’ aging / worklist dekho (DB-backed).

Step 2: Scrub
Claim Scrubber !’ scrub !’ agar errors hain to submit disabled.

Step 3: Statements
Statements !’ period + delivery !’ Generate !’ DB rows + list.

Clinic team kaise use kare

- Clearinghouse live keys alag track; scrubber pehle local quality gate hai.

3.11 Telehealth — Phone platform (privacy Call)

Kya banaya / kya change hua

- Platform PHONE support.
- Connect modal: “Call {firstName}” — phone digits DOM mein nahi.
- Upcoming tab pe bhi phone rows ke liye Call {firstName}.

Flow (kaise chalta hai)

Step 1: Schedule / start
Telehealth !’ phone session !’ Start/Call !’ consent note !’ Call FirstName.

Step 2: Privacy
Number tel: link pe rehta hai, screen pe print nahi.

Clinic team kaise use kare

- Call se pehle verbal consent confirm karein (UI pe reminder hai).

3.12 Intake — Homeless + First Visit Note

Kya banaya / kya change hua

- Homeless checkbox !' public form pe address required nahi.
- First Visit Note !' ProgressNote save.
- Telehealth FVN pe verbal consent rule.

Flow (kaise chalta hai)

Step 1: Invite
Staff Intake !' homeless flag / appointment type !' send link.

Step 2: Patient form
Token URL !' homeless pe address waive !' submit.

Step 3: FVN
Staff First Visit Note likh kar save !' ProgressNote.

Clinic team kaise use kare

- Homeless clients ke liye address force mat karein — flag sahi set karein.

3.13 RMS (Rapid Mood Screener) — 10 YES/NO

Kya banaya / kya change hua

- Full 10-item instrument catalog mein.
- Score "e 5 !' Screen Positive — Bipolar I; AssessmentScore/ClinicalAssessmentRecord DB.

Flow (kaise chalta hai)

Step 1: Open
EHR !' Assessments !' RMS.

Step 2: Complete
10 YES/NO !' submit (clinician verified).

Step 3: Result
"e5 yes !' Screen Positive toast/severity + DB row.

Clinic team kaise use kare

- Positive screen pe MDQ / psych referral clinical judgement se follow-up.

3.14 C-SSRS + crisis-flag event

Kya banaya / kya change hua

- C-SSRS Brief page; signature / verified gate.
- Imminent / high path !' ClinicalEvent crisis-flag (+ EventBridge jab configured).

Flow (kaise chalta hai)

Step 1: Administer
Assessments !' C-SSRS !' items + signature !' save.

Step 2: Escalate
High/imminent !' crisis-flag API !' ClinicalEvent row.

Clinic team kaise use kare

- High risk pe local crisis protocol follow karein — system flag support hai, replacement nahi.

3.15 Communications (Connect SMS / Call)

Kya banaya / kya change hua

- Communications page !’ SMS / call / thread.
- Rows ConnectMessage / ConnectCall; AWS na ho to demoMode OK.

Flow (kaise chalta hai)

Step 1: Open
Dashboard !’ Communications !’ client.

Step 2: SMS
Message type !’ Send !’ thread refresh pe row.

Clinic team kaise use kare

- Live SMS ke liye AWS Connect / SMS env chahiye; warna demo Mode dikhega.

3.16 Notes — smart phrases, copy-forward, Comprehend

Kya banaya / kya change hua

- `.cbt` (aur phrases) expand.
- Copy-forward last SOAP same client.
- Comprehend analyze panel (demoMode if no AWS).

Flow (kaise chalta hai)

Step 1: Phrase
Notes editor mein .cbt type !’ phrase insert.

Step 2: Copy-forward
Same client ki last note se pull.

Step 3: Comprehend
Analyze !’ Network POST /api/comprehend/analyze.

Clinic team kaise use kare

- Demo Preview mode notes pe band rakhein jab asl chart likh rahe hon.

3.17 HealthLake + Textract + Personalize + Ctrl+K

Kya banaya / kya change hua

- HealthLake page: status GET + import POST (toast-only nahi).
- Scanner: Textract insurance scan job.
- Home widgets: psychiatrist vs peer_support alag insight copy/roleKey.
- Ctrl/Cmd+K palette real clients fetchClients se.

Flow (kaise chalta hai)

Step 1: HealthLake
EHR !’ HealthLake !’ Status; Import jab datastore configured ho.

Step 2: Textract
Scanner !’ insurance image !’ analyze.

Step 3: Personalize
Role home pe Caseload Health / Insights cards.

Step 4: Palette
Ctrl+K !’ client name search !’ jump.

Clinic team kaise use kare

- AWS missing = DEMO badge / fail-closed — credentials ke baad live enrich.

3.18 Evaluations — CAGE-AID + ASAM (+ AI Draft disabled)

Kya banaya / kya change hua

- SUD / ASAM template pe CAGE-AID + ASAM widgets.
- Save !’ ClinicalEvaluationRecord.
- AI Draft honestly disabled jab model nahi (fake draft nahi).

Flow (kaise chalta hai)

Step 1: New eval
EHR !’ Evaluations !’ Substance / ASAM template.

Step 2: Fill widgets
CAGE-AID + ASAM dimensions !’ Save draft.

Clinic team kaise use kare

- AI Draft tab enable hoga jab model/env intentionally on ho.

---

4. Clinic / Admin — week ka kaam kaise verify kare (short checklist)

- Login PD + Therapist dono se — PII mask farq dikhna chahiye.
- Public /schedule se ek test book !’ AC-###### confirmation.
- Labs mein Other panel order !’ refresh !’ row maujood.
- RMS "e5 yes !’ Screen Positive; C-SSRS high !’ crisis event.
- Homeless intake invite !’ address skip; FVN note save.
- Telehealth phone !’ Call FirstName, number screen pe nahi.
- Billing Statements generate !’ list mein statement.
- Ctrl+K se real client open.

5. Live deploy pe zaroori (warna pehle wala code toot sakta hai)

Step 1: Schema
Production Postgres pe prisma schema sync (naye tables: labs, statements, connect, healthlake, etc.).

Step 2: Env
Existing auth/DB/SMTP rakhein. PRP_ELIGIBILITY_TEST_PASS true mat. AWS keys optional — bina unke demo/fail-closed.

Step 3: Deploy app
Build + release; server restart.

Step 4: Smoke
Section 4 checklist live pe 10–15 min.

---

6. Is week prove kiya gaya (engineering evidence)

- Local Postgres (SSH tunnel 5433) pe schema sync.
- npm/next production build exit 0.
- API smoke 200: migration, TMS, labs, A/R, PRP, sensitive-records, HealthLake status, scheduling settings.
- Manuals M1–M14 sab PASS — har persist flow ke DB ids ke saath.

7. Abhi alag track / intentional limits

- Waystar/Availity “full live clearinghouse day-2 ops” credentials clinic pe depend.
- AWS Connect/HealthLake/Personalize/Textract bina keys ke demoMode.
- PRP enroll Availity ke bina fail-closed — yeh safety hai.

Closing

Pichle week (18 Sep Friday sham se 28 Sep) ka focus yeh tha: clinic ke real workflows ko is production Altrixs repo mein same flow + UI ke saath lana, data Postgres mein save karna, aur jahan bahar ki service missing

ho wahan jhoothi success ki jagah honest mode rakhna. Upar har module ka use-flow clinic team seedha follow kar sakti hai; live pe schema + env ke baad yeh slices ship-ready hain.
