ALTRIXS · STAFF PORTAL · PHASE 1

Developer kaam + test guide

Hinglish, simple language. Ek-ek karke kya banana hai, kaunsa button kyun hai aur kaise check karna hai. Mobile app is phase me nahi. Video = Zoom. Database = Postgres.

Audience: junior / clinic developer | **15 Sep 2026** | **v1.0**

Pehle dimag me yeh baithao

- Patient mobile app mat banana. Woh Phase 2 hai. Client abhi browser use karega — intake link aur Zoom join link.
- PDF / client doc me Chime + Firestore likha ho to ignore. Humara stack: Zoom + Postgres.
- SMS / email me kabhi diagnosis, session note, "depression", medicine naam mat likhna. Sirf date, time, doctor ka naam, ya "You have a new message."
- Naya feature se pehle purana clinic loop chalao. Woh toot gaya to naya kaam merge mat karo.

Suggested order (upar se neeche)

0 !’ 1 !’ 2 !’ 3 !’ 4 !’ 5 !’ 6 !’ 7 !’ 8 !’ 9 !’ 10 !’ 11 !’ 12. Ticket 8 (Claims) jab clearinghouse active ho.

0 Pehle existing clinic loop chalao (naya code nahi)

SIMPLE MATLAB
Puraani saari core clinic functionalities (Waitlist, Intake, Appointments, Progress Notes) sahi chalni chahiye.

YEH BUTTON / FEATURE KYUN HAI?
Buttons like "Convert to Intake", "Sign & Lock Note", aur "Draft Claim" isliye hain taaki patient ki journey front desk se lekar doctor note lock tak bina break hue workflow complete ho sake.

KYA KARNA HAI
• Database seed command chalao: Altrixs@123 seed passwords.
• Role demo clinic accounts test karo: office@role-demo.local (front desk), therapist@role-demo.local, billing@role-demo.local.

TEST (MANUALLY KAISE CHECK KAREIN)
1. Waitlist !’ match clinician !’ Convert to Intake !’ public /intake/... complete !’ client roster me naam dikhe.
2. Appointment virtual + in-person. Check-in. Note Draft !’ Sign !’ Lock.
3. Mood 2/10 check-in !’ Alerts me dikhe !’ review update.
4. Locked note se Draft claim bane. NP/Psych Rx page therapist ko role access se block ho.

1 Live clinic ke liye keys (.env setup)

SIMPLE MATLAB
App ko batana hai ki Database, Auth Secrets, Zoom credentials aur Availity keys kahan store hain.

YEH BUTTON / FEATURE KYUN HAI?
Env settings koi button nahi hoti, par pure platform ki API calls (Zoom, Postgres, Availity) ko enable karti hai. Iske bina live API integrations silently crash hone lagte hain.

KYA KARNA HAI
• DATABASE_URL, AUTH_SECRET, AUTH_URL ko local/live URL ke mutabiq set karo.
• Zoom Account ID, Client ID, Client Secret ko .env.local file me rakho.
• Secrets ko GitHub par push/commit MAT KARO.

TEST (MANUALLY KAISE CHECK KAREIN)
1. Login properly chale. Keys missing ho to readable error dikhe, blank white screen na aaye.
2. Wrong AUTH_URL par login loop ya cookie crash nahi hona chahiye.

2 Clinical Assessments (PHQ-9, GAD-7 & Trend Graphs)

SIMPLE MATLAB
Patient ke depression, anxiety, ya behavioral risk ko standard questionnaire digitalize karke calculate karna.

YEH BUTTON / FEATURE KYUN HAI?
"+ Administer Digital" button questionnaire modal kholta hai. "Submit Assessment" button total score compute karta hai aur DB me persistence save karta hai. "History & Trends" tab chart render karta hai taaki doctor dekh sake ki patient ki depression severity kam hui ya badhi.

KYA KARNA HAI
40+ instruments catalog support kare. Digital questionnaires bharein, auto-calculate total score, item-by-item breakdown aur history trends chart update ho.

MAT KARNA
Static mock values hardcode mat karo. Database se real assessment records load hone chahiye.

TEST (MANUALLY KAISE CHECK KAREIN)
1. URL /dashboard/ehr/assessments par jao. Top dropdown se patient choose karo.
2. "PHQ-9" search karke "+ Administer Digital" button dabao.
3. Saare 9 questions ke answers select karo (Q9 suicide ideation High select karo).
4. "Submit Assessment" dabao !' Red Safety Alert Flag aur auto-score 19 (Severely Depressed) dikhna chahiye.
5. F5 refresh ke baad "History & Trends" tab me graph par score saved rehna chahiye.

3 Clinical Evaluations & Locked Addendums (v1 -> v2)

SIMPLE MATLAB
Doctor patient ka detailed intake assessment aur diagnosis report likhta hai. Legally signed note change nahi ho sakta, sirf versioned addendum add hota hai.

YEH BUTTON / FEATURE KYUN HAI?
"+ New Evaluation" button 8 standard clinical templates load karta hai. "Sign & Finalize" button note ko permanent lock (v1) kar deta hai taaki koi audit me tempered note na kahe. "Amend Record" button v2 addendum create karta hai legally compliant version tracking ke liye.

KYA KARNA HAI
Mental Status Exam (MSE), Risk Level Widget, aur ICD-10 Diagnosis autocomplete integrate karein. Sign & Finalize ke baad note immutable ho jaye.

TEST (MANUALLY KAISE CHECK KAREIN)
1. URL /dashboard/ehr/evaluations par jao. "+ New Evaluation" button dabao.
2. Template select karke MSE findings, Risk level, aur ICD-10 "Depression" (F32.9) add karo.
3. Clinician signature add karke "Sign & Finalize Evaluation" dabao !' Card par "Finalized (v1)" badge dikhega.
4. "Amend Record" button dabao, extra progress note text dalo aur save karo !' Badge update hokar "v2 (Amended)" audit log trail ke saath dikhega.

4 LOCUS / CALOCUS Level of Care Assessment Engine

SIMPLE MATLAB
Insurance ko prove karna ki patient ko kaunsi level ki therapy (Outpatient vs Inpatient) chahiye, based on 7 scoring dimensions.

YEH BUTTON / FEATURE KYUN HAI?
"Clinician Override" button isliye diya gaya hai kyunki automated math score ke alawa doctor ki clinical judgment decision supercede kar sakti hai agar written rationale diya jaye.

KYA KARNA HAI
Adult LOCUS aur Youth CALOCUS ke 7 dimension rating buttons (Risk of Harm, Functional Status, etc.) se composite score aur Level of Care auto-recommend karein.

TEST (MANUALLY KAISE CHECK KAREIN)
1. URL /dashboard/ehr/locus par jao.
2. Saare 7 dimensions par rating buttons select karo (e.g. Risk of Harm = 3) !' Live Recommended Level update hoga.
3. "Clinician Override" button dabao, text area me rationale likho, aur "Save LOCUS Assessment" click karo.
4. Assessment history drawer me saved entry with custom rationale dikhni chahiye.

5 Mandatory Reporting & Duty to Warn (COMAR 07.02.07)

SIMPLE MATLAB
Jab patient kisi doosre ko nuksan pahunchane (Tarasoff) ya child/vulnerable adult abuse ki threat de, to doctor ko legal report file karni padti hai.

YEH BUTTON / FEATURE KYUN HAI?
"+ Document Report" button COMAR compliance form kholta hai. "Print Report" button official law enforcement document format print karta hai. Chevron "v" button card expand karke legal case #, agency, aur timeline checklist dikhata hai.

KYA KARNA HAI
Emergency hotlines banner, 90-day metrics cards, 6 legal reporting categories, 12h-72h statutory deadlines, aur compliance matrix boxes implementation.

TEST (MANUALLY KAISE CHECK KAREIN)
1. URL /dashboard/compliance/mandatory-reporting par jao.
2. Emergency banner aur metrics cards verify karo.
3. "+ Document Report" button dabao, "Duty to Warn / Protect (Tarasoff)" choose karo.
4. Victim Name, Agency (Baltimore City Police), Case # (BPD-2026-449821) dalo aur save karo.
5. Feed card me Chevron "v" click karke expand check karo, phir "Print Report" dabao.

6 Measurement-Based Care (MBC) Risk Panel

SIMPLE MATLAB
High-risk patients (suicidal ideation / severe depression score) ko dashboard par alert karke acknowledge karna.

YEH BUTTON / FEATURE KYUN HAI?
"Acknowledge Alert" button isliye hai taaki clinic director / supervisor mark kar sake ki emergency alert ko human review kar liya gaya hai aur safety action plan update ho gaya hai.

KYA KARNA HAI
Attention Required panel high-risk flagged patients ko dikhaye. Acknowledgment modal notes capture kare aur DB status update kare.

TEST (MANUALLY KAISE CHECK KAREIN)
1. URL /dashboard/mbc par jao.
2. Flow 2 se severe PHQ-9 flag wala patient list me dekho.
3. "Acknowledge Alert" button dabao, response note likho ("Reviewed score, updated safety plan") aur save karo.
4. Alert tag DB me Acknowledged mark ho jayega.

7 Insurance Eligibility Verification (Availity EDI 270/271)

SIMPLE MATLAB
Check karna ki patient ki insurance policy active hai ya nahi pehle treatment dene se.

YEH BUTTON / FEATURE KYUN HAI?
"Check Eligibility" button real Availity clearinghouse API ko call karta hai aur benefit co-pay/deductible display karta hai.

KYA KARNA HAI
Patient insurance details check kare. DB me status persist kare. Non-billing roles ko page block rakhe.

TEST (MANUALLY KAISE CHECK KAREIN)
1. /dashboard/billing/eligibility par patient select karke eligibility verify karo.
2. Refresh ke baad result table row persistent honi chahiye.

8 Claims Batch & Electronic Prior Authorization (EDI 278 & 837)

SIMPLE MATLAB
Insurance company ko bill (Claim EDI 837) aur Pre-approval request (Prior Auth EDI 278) electronically bhejna.

YEH BUTTON / FEATURE KYUN HAI?
"Submit Prior Auth" button EDI 278 JSON payload process karta hai. "Submit 50-Claim Batch" button claims clearinghouse pipeline test karta hai bina single-single manual claim create kiye.

KYA KARNA HAI
Locked notes se claim draft generate karein. EDI payloads clearinghouse simulator se return hon.

TEST (MANUALLY KAISE CHECK KAREIN)
1. /dashboard/billing/prior-auth par service code 90837 choose karke "Submit Prior Auth" dabao !' Live EDI payload response dikhega.
2. /dashboard/billing/claims par "Submit 50-Claim Batch" click karke 50 claims batch process test karo.

9 Zoom Telehealth (Staff + Client Browser Join)

SIMPLE MATLAB
Doctor and patient bina koi app download kiye browser Zoom call join karein.

YEH BUTTON / FEATURE KYUN HAI?
"Start/Join Meeting" button doctor ke liye host interface kholta hai. Client link email/SMS se bina login ke incognito me call join karwane ke liye hai.

TEST (MANUALLY KAISE CHECK KAREIN)
1. Front desk Virtual appointment create kare.
2. Therapist "Start/Join" dabaye !' Zoom meeting window open ho.
3. Client link ko Incognito browser window me join karke verify karo.

10 Client Papers & Medical Records Upload

SIMPLE MATLAB
Purani lab reports, insurance card photos chart pe upload karke patient profile se attach karna.

YEH BUTTON / FEATURE KYUN HAI?
"Upload Document" button physical paper records ko digital EHR chart me save karta hai.

TEST (MANUALLY KAISE CHECK KAREIN)
1. Patient profile par document upload karo.
2. Therapist same client profile khol kar file preview/download kar sake.

11 Safety Plan & Crisis Hotlines

SIMPLE MATLAB
Suicidal risk walo ke liye 6-step coping plan aur 988 emergency hotline details.

YEH BUTTON / FEATURE KYUN HAI?
"Save Safety Plan" button crisis plan ko permanent patient chart me lock karta hai.

TEST (MANUALLY KAISE CHECK KAREIN)
1. Safety plan edit karke 6 steps fill karo aur save click karo.
2. 7-day follow up task list me auto-create hoga.

12 Multi-Tenant Data Protection & Role Access

SIMPLE MATLAB

Clinic A ka doctor Clinic B ke patient records URL change karke na dekh sake. Therapist billing page na khol sake.

YEH BUTTON / FEATURE KYUN HAI?

Role Access Guard buttons & links ko user permissions ke base par auto-hide / 403 block karta hai.

TEST (MANUALLY KAISE CHECK KAREIN)

1. Therapist account se billing URL type karo !’ 403/Bounce to dashboard.
2. npm run typecheck run karke verify karo zero errors.

Abhi mat banana (Phase 2 / Baad me)

Cheez / Feature	Kyun nahi abhi?
Patient mobile app (login/home)	Phase 2. Client browser intake link use karega.
App se PHQ, push notifications	Web app ke baad baseline requirement complete hone par.
AWS Chime / Bedrock AI note	Humara stack: Zoom + Postgres.
DrFirst PDMP / EPCS	Jab clinic actual DrFirst contract signature kare. Abhi Availity.
Clearinghouse 277 + ERA 835	Vendor active enrollment process under review.

Sawal ho to lead se poochh (khud mat decide)

- Ticket 8 claims batch payment day-one requirement hai ya launch ke baad?
- License expire pe hard block (appointment create nahi hone dena) ya alert warning banner?
- Client Zoom call no-show hone par appointment status automatically Missed change hoga ya manual?
